Day: Date: Start Time: End Time:  
**Fri April 13 9:40 AM 10:30 AM**

Room:  
**Salon DEF**

Presentation/Poster:

Session Type: Session Title:

**Keynote Panel** **Hope in Utah's Opioid Crisis: Strategies for Treatment and Recovery**

### Session Details

#### Session Description:

Conference participants will hear from a diverse range of experts about strategies for opioid treatment and recovery. Drug poisoning is the leading cause of injury death in Utah. Utah is taking a comprehensive approach to address the opioid crisis, from building public awareness about the dangers of opioids, to improving prescribing and dispensing practices among providers and pharmacies, expanding distribution of the opioid-overdose reversal drug, Naloxone, and expanding access to treatment services. Today's presentation will focus on treatment, including treatment options available, how to connect people to treatment, and understanding early warning signs that someone may need treatment help.

#### Learning Objectives:

- Understand treatment services available in Utah.
- Learn at least two concrete steps to take to connect someone with treatment.
- Understand at least three early warning signs that someone may need help.

#### Presentation Methods:
